How to Use This Suite

This document suite is the complete investor package for the ATLAS Travel Club angel / pre-seed round. It is structured to be reviewed sequentially: the financial model and budget establish the quantitative case; the pitch deck provides the narrative arc for live presentation; the prospectus serves as the standalone leave-behind; and the outreach script enables initial contact. All materials are governed by the Mutual Non-Disclosure Agreement delivered alongside this suite.

Recommended distribution sequence: (1) execute the Mutual NDA; (2) send the 1-page prospectus and the outreach email to qualified prospects; (3) on positive reply, share the full Investor Document Suite; (4) schedule a 30-minute live walkthrough using the 10-slide deck; (5) collect SAFE subscriptions against the \$1.75M cap.

1. Financial Model & Unit Economics

Document purpose. Establish the quantitative investment case for ATLAS Travel Club across blended ARPU, customer acquisition economics, and a three-year pro-forma income statement. All figures reflect the broad frequent-traveler market (Affluent Families, SMBs/Unmanaged Corporate, Luxury Seekers, and Extended-Stay/Nomad travelers) using the 0% markup wholesale subscription model.

1.1 Blended Membership Tiers & ARPU

Tier	Target Audience	Mix %	Annual Price	Avg GMV/yr	Savings (25% spread)
Club	Frequent Solo/Couple Leisure	50%	\$349	\$6,200	\$1,550 (4.4x ROI)
Family / Patron	Affluent Vacationers & Villas	30%	\$699	\$14,500	\$3,625 (5.2x ROI)
Business / VIP	SMBs, Founders & Luxury	20%	\$1,499	\$32,000	\$8,000 (5.3x ROI)
BLENDED AVERAGE	—	100%	\$684	\$13,850	\$3,462

Blended Subscription ARPU: \$684.00 / year

Fintech Card Interchange Revenue: 1.2% net yield on \$13,850 average card spend = \$166.20 / member / year

Total Annual Net Revenue per Member (ARPU): \$850.20

1.2 Customer Acquisition Economics (CAC → LTV)

- **Blended CAC:** \$115.00 across organic savings calculator audits, SMB referral programs, creator partnerships, and targeted digital acquisition.
- **Subscription Gross Margin:** 94% (SaaS delivery cost < \$40/yr for server, AI queries, and support).
- **First-Year Gross Profit per Member:** $\$850.20 \times 94\% = \799.18
- **Year 1 CAC Payback Period:** $\$115 \div (\$850.20 / 12) = 1.6 \text{ months}$ (instant cash return).
- **3-Year LTV** (assuming 82% annual renewal): $LTV = \$799.18 / 0.18 = \$4,440$
- **LTV : CAC Ratio:** $\$4,440 / \$115 = 38.6 : 1$ (tier-1 SaaS/Fintech benchmark).

1.3 3-Year Pro-Forma Income Statement (P&L;)

Figure 1. ATLAS 3-Year Revenue & EBITDA Growth — Total Net Revenue (bars) and EBITDA (line) in USD millions.

Metric	Year 1 (Launch)	Year 2 (Scale)	Year 3 (Expansion)
Ending Active Members	1,000	6,000	25,000
Gross Travel Volume (GMV)	\$13,850,000	\$83,100,000	\$346,250,000
Subscription Revenue	\$684,000	\$4,104,000	\$17,100,000
Fintech & Ancillary Revenue	\$166,200	\$997,200	\$4,155,000
TOTAL NET REVENUE	\$850,200	\$5,101,200	\$21,255,000
Cost of Software, APIs & Telecom	(\$52,000)	(\$290,000)	(\$1,150,000)
Gross Profit (93.8% margin)	\$798,200	\$4,811,200	\$20,105,000
Member Acquisition / Marketing	(\$185,000)	(\$920,000)	(\$3,250,000)
Engineering, Ops & Support Salaries	(\$190,000)	(\$850,000)	(\$2,600,000)
Legal, Compliance & Facilities	(\$45,000)	(\$120,000)	(\$350,000)
G&A and Cloud Infrastructure	(\$28,000)	(\$160,000)	(\$755,000)
NET OPERATING PROFIT (EBITDA)	+\$350,200	+\$2,761,200	+\$13,150,000
EBITDA Margin	41.2%	54.1%	61.9%

2. The Lean \$75,000 Budget & 12-Month Runway Allocation

Document purpose. Specify the use of proceeds for the \$75,000 angel / pre-seed SAFE. The capital plan is engineered to transition ATLAS from its current working codebase to a live B2B bedbank-connected engine with its first 1,000 paid members.

Figure 2. \$75,000 Pre-Seed Capital Allocation — six expense categories expressed as USD and percentage of total raise.

Expense Category	Budget	Details & Key Milestones
Targeted Member Acquisition	\$26,500	• Private VIP Beta outreach to corporate executives, frequent flyer groups, and luxury travel forums. • Interactive “Savings Audit” tool ads (\$50 spend test per channel). • Affiliate co-marketing with boutique wealth managers & SMB networks.
Core API Implementation	\$19,000	• 3 focused developer sprints to wire live RateHawk / Hotelbeds XML/JSON pipelines into the existing UI. • Duffel NDC Flight API integration & instant ticketing webhook.
Legal & Seller of Travel (SoT)	\$9,500	• Delaware C-Corp formalization & stock option pool setup. • US Seller of Travel registrations (California, Florida, Washington state). • Custom Closed-Loop Membership Agreement & Terms of Service review.
Fintech & Telecom Revolving Float	\$7,000	• Stripe Issuing pre-funding operating float (\$4,000). • Airalo B2B credit balance for instant eSIM provisioning (\$1,500). • Wise multi-currency account reserve (\$1,500).

Cloud Hosting & AI Tokens	\$5,000	• 12 months Vercel Enterprise, Supabase DB, and Anthropic/OpenAI API tokens for the AI Concierge.
Contingency Reserve	\$8,000	• 10.6% buffer for unforeseen operational expenses.
TOTAL	\$75,000	Fully funded to 1,000 active members and \$850k net revenue run rate.

3. 10-Slide Investor Presentation Script & Visual Outline

Document purpose. Provide the slide-by-slide narrative, visual direction, and talking points for the live investor presentation. Designed for a 30-minute meeting: 20 minutes presentation, 10 minutes Q&A.

SLIDE 1 Cover & Elevator Pitch

Headline: ATLAS Travel Club

Sub-headline: The private membership club passing 100% of wholesale travel savings to members at 0% markup.

Visual: Crisp mockups of ATLAS web app on desktop and mobile showing 0% markup rates alongside live Expedia/Booking.com price benchmarks.

Presenter: Founder & CEO

SLIDE 2 The Problem — The \$350B OTA Tax

- **The public travel market is broken:** Booking Holdings and Expedia Group operate a duopoly, charging hotels 15%–30% commissions.
- **Rate parity lock-in:** Hotels are legally barred from displaying discounted rates on public websites, leaving frequent travelers and families paying retail markup.
- **The unserved center:** Affluent families, SMB founders, and luxury travelers waste tens of thousands annually because they lack Fortune 500 negotiated enterprise rates.

SLIDE 3 The Solution & Regulatory Arbitrage

- **Closed-loop legal exemption:** Under US Sherman Antitrust and European competition rulings (French Loi Macron, EU AT.40153), rate parity restrictions do NOT apply to closed-loop, password-protected membership clubs.
- **The digital Costco for travel:** ATLAS acquires inventory directly from global B2B bedbanks (Hotelbeds, RateHawk, WebBeds) at wholesale net cost and passes 100% of the savings to authenticated members.
- **0% markup:** We take zero commission on travel bookings. We monetize purely through recurring memberships.

SLIDE 4 The Four High-Value Target Segments

- **Affluent Families & Vacationers** (\$8k–\$25k/yr spend): save \$1,500+ on a single 7-night luxury resort holiday.
- **SMB Owners & Consultants** (\$15k–\$60k/yr spend): enterprise-grade corporate rates with zero bureaucratic overhead.
- **Luxury & Experiential Travelers** (\$30k–\$100k+/yr spend): 5-star suites, villas, and private charter access at transparent pricing.
- **Borderless Remote Professionals** (\$10k–\$30k/yr spend): extended stays, global 5G eSIMs, and visa intelligence.

SLIDE 5 The Product — Phase 1 Built & Functional

- **Live production app:** fast Next.js application with interactive retail price comparison benchmarks.
- **Proprietary rate-parity shield:** robust authentication gate (AuthModal) and crawler blockers (robots.txt / noindex) protecting supplier agreements.
- **Autonomous AI Travel Concierge:** natural language search, booking recommendations, and automated itinerary generation.

SLIDE 6 Business Model & Unit Economics

- **Multi-tier recurring SaaS:** Club \$349/yr (solo & couples); Family/Patron \$699/yr (families & villas); VIP/Business \$1,499/yr (SMBs & luxury).
- **Secondary revenue:** 1.2% debit interchange yield on co-branded reloadable Visa cards.
- **Attractive unit economics:** blended ARPU \$850/yr; blended CAC \$115; payback period 1.6 months; LTV \$4,440 (38x CAC:LTV).

SLIDE 7 Traction, Assets & Roadmap

- **Phase 1 (Completed):** fully responsive front-end, compliance shields, rate calculators, and operational manuals.
- **Phase 2 (Months 1–3):** connect live RateHawk / Hotelbeds XML/JSON feeds, Duffel NDC flights, and Stripe Issuing.
- **Phase 3 (Months 4–6):** launch 24/7 price-drop rebooking engine and automated 5G eSIM provisioning.
- **Phase 4 (Months 7–12):** high-touch WhatsApp/Telegram AI Concierge and private jet empty-leg distribution.

SLIDE 8 Go-to-Market (GTM) Strategy

- **The “Live Savings Audit” tool:** prospective members upload an upcoming hotel confirmation; ATLAS instantly shows the exact dollar savings behind the member gate.
- **B2B syndicate partnerships:** distribution through boutique corporate travel managers, wealth management perks, and executive networks.
- **Zero-risk value guarantee:** “If ATLAS doesn't save you more than your annual membership fee on your first booking, we refund 100% of your membership.”

SLIDE 9 Competitive Landscape & Moat

- **vs. public OTAs (Expedia/Booking):** ATLAS is 20%–30% cheaper on every hotel stay.
- **vs. legacy travel clubs (Inspirato):** Inspirato costs \$10k–\$30k/yr with high capital risk. ATLAS is accessible (\$349–\$1,499/yr) and completely asset-light.
- **The moat:** closed-loop supplier compliance, proprietary price-drop rebooking engine, and high-retention subscription cash flows.

SLIDE 10 The Ask & Capital Plan

- **Raising:** \$75,000 USD via YC Post-Money SAFE.
- **Valuation cap:** \$1,750,000 USD (3.5%–4.5% dilution).
- **Milestone:** complete live API integrations and reach 1,000 paid members (\$850,000 net ARR run-rate) within 9–12 months.

4. Confidential Private Placement Memorandum / Investor Prospectus

CONFIDENTIAL PRIVATE PLACEMENT MEMORANDUM

Entity:	ATLAS Travel Club Inc. (Delaware C-Corp)
Offering:	Up to \$100,000 USD via Y Combinator Post-Money SAFE (Target: \$75,000 USD)
Valuation Cap:	\$1,750,000 USD
Discount:	20%
Contact:	executive@atlas-travel-club.com
Staging:	http://localhost:3005

4.1 Executive Summary

ATLAS Travel Club is an asset-light, subscription-based travel collective and fintech platform designed for high-spend leisure travelers, families, and SMBs. By operating as a strictly password-gated, closed-loop private club, ATLAS is legally exempt from OTA rate parity restrictions under US antitrust and EU competition law. ATLAS procures room inventory directly from institutional B2B bedbanks (Hotelbeds, RateHawk, WebBeds) at wholesale net clearing prices, passing **100% of the savings directly to members at 0% markup.**

4.2 Problem & Opportunity

The \$1.4 trillion accommodation market is taxed by an OTA duopoly (Expedia Group & Booking Holdings) taking 15%–30% commissions. Hotels are barred by contract from offering public discounts. This penalizes the top 20% of travelers — affluent vacationers, business travelers, and luxury seekers — who spend over \$10,000 annually. ATLAS eliminates the intermediary markup, returning \$1,500 to \$8,000 in annual savings directly to each member's pocket.

4.3 Business Model & Financial Strategy

ATLAS does not carry real estate assets or take inventory liability. Revenue is driven by:

- 1. Recurring software subscriptions:** \$349 (Club), \$699 (Family), and \$1,499 (VIP/Business) annual tiers.
- 2. Fintech card interchange:** 1.2% net yield on reloadable co-branded Visa debit spend.
- 3. High cash conversion:** 94% subscription gross margins, with annual fees collected upfront, yielding negative working capital requirements.

4.4 Use of Proceeds (\$75,000 Budget)

%	USD	Category
35.3%	\$26,500	Customer Acquisition & Referral Distribution

25.3%	\$19,000	B2B Bedbank & Flight API Implementation Sprints
12.7%	\$9,500	Legal Entity, State Seller of Travel Licenses & Compliance
9.3%	\$7,000	Fintech Revolving Operating Float & Telecom Credit
6.7%	\$5,000	Cloud Infrastructure, Supabase DB & AI Inference
10.7%	\$8,000	Operating Reserve
100%	\$75,000	Total

4.5 Risk Factors

Prospective investors should consider, among others, the following risk factors before subscribing to the SAFE: (a) ATLAS is a pre-revenue early-stage company dependent on completing Phase 2 supplier integrations to generate live booking revenue; (b) the closed-loop rate-parity legal interpretation, while grounded in US Sherman Act and EU competition precedent, may be challenged by hotels or OTAs and requires ongoing compliance oversight; (c) the business depends on continued wholesale access to third-party bedbanks (Hotelbeds, RateHawk, WebBeds) whose commercial terms may change; (d) SAFE securities are not guaranteed and may result in total loss of capital; (e) projected member counts, ARPU, and EBITDA margins are forward-looking estimates subject to market and execution risk.

5. Investor Pitch Outreach Script & Target Backer Archetypes

Document purpose. Equip the founder with target backer profiles and a high-conversion outreach script for cold and warm introduction emails.

5.1 Target Backer Profiles (Who to Pitch)

1. Frequent Traveler Angels. Founders, executives, and consultants who travel 30+ days per year and personally experience the pain of paying OTA markups. They invest from domain conviction and frequently become design partners and early members.

2. Travel Tech & Fintech Operators. Former employees or founders from Hopper, TripActions/Navan, HotelTonight, Revolut, Brex, or Wise. They bring operating leverage, supplier relationships, and pattern-matching on subscription + interchange business models.

3. SMB / Agency Owners. Founders with 5–50 employees who immediately see the utility of a \$1,499/yr corporate membership. They typically invest smaller checks but convert to the Business/VIP tier and refer other SMB owners.

5.2 High-Conversion Outreach Message (Email / LinkedIn)

Subject: ATLAS Travel Club (0% markup wholesale travel) — \$75k Angel SAFE

Hi [Name],

I saw your background with [relevant company or investment] and wanted to share what we've built.

We just completed Phase 1 of ATLAS Travel Club — a private, closed-loop travel collective that

Think of it as the digital Costco for the \$1.4T travel market:

- The Audience: High-spend families, SMB business travelers, and luxury vacationers spending \$10k+/yr
- Unit Economics: \$850 blended ARPU (subscription + card interchange), \$115 CAC, 94% gross margin
- Current Status: Phase 1 web app is built with compliance gates, rate comparison benchmarking, and

We are closing a lean \$75,000 Angel SAFE at a \$1.75M cap to connect our live B2B bedbank feed

Check out our live staging platform here: [Demo Link]

Would you be open to a 10-minute call this week to review our 1-page memo?

Best regards,

Pål Juritzen

Founder & CEO, ATLAS Travel Club

executive@atlas-travel-club.com

5.3 Conversion Optimization Notes

Personalize the bracketed fields for each recipient. Reference a specific portfolio company, blog post, or LinkedIn achievement to demonstrate genuine research. The 10-minute ask is intentional: it lowers the friction of saying yes and forces the founder to deliver a tight pitch. Always attach the 1-page prospectus (Section 4) to the calendar invite — never send the full suite unsolicited before the NDA is executed. Track each touch in a simple CRM (Notion, Airtable, or Attio) with status: Sent / Replied / Call Scheduled / Pass / Invested.

Expected response benchmarks for angel-stage cold outreach: 15–25% open rate; 5–10% reply rate; 1–3% conversion to a call. Warm introductions through mutual connections typically 5x these rates. Prioritize warm intros for checks above \$25K.
