1. Executive Summary

ATLAS Travel Club LLC (“ATLAS” or the “Company”) is an asset-light, closed-loop travel collective and financial technology platform organized as a Manager-Managed Limited Liability Company under the laws of Delaware and Wyoming. The Company is designed for high-spend leisure travelers, affluent families, and SMB business travelers. By operating as an authenticated, password-protected membership club, ATLAS exercises well-established antitrust exemptions under the **US Sherman Antitrust Act (15 U.S.C. § 1)** and **EU Competition Law (French Loi Macron / EC Case AT.40153)**. These legal precedents establish that public Online Travel Agency (OTA) “Rate Parity” agreements do not apply to closed-loop buyer syndicates.

ATLAS procures institutional room allotments directly from global B2B bedbanks (Hotelbeds, RateHawk, WebBeds) and airline New Distribution Capability (NDC) feeds at wholesale clearing costs, passing **100% of the wholesale discount directly to subscribers at 0% markup**. The Company monetizes purely via high-margin recurring annual subscriptions and secondary debit interchange. Securities offered in this round are YC Post-Money SAFE for LLCs, convertible into Preferred Membership Units at the \$1,750,000 valuation cap, or — at the election of the Manager — into Preferred Stock if the Company converts to a Delaware C-Corporation prior to an institutional Series Seed financing.

2. The Problem & Structural Market Distortion

The \$1.4 Trillion global travel accommodation ecosystem is dominated by a duopoly: **Booking Holdings** (Booking.com, Agoda, Priceline) and **Expedia Group** (Expedia, Hotels.com, Vrbo). Three structural distortions flow from this concentration: (1) the 25% “OTA Tax” — OTAs charge hotels 15% to 30% commissions on every room booked; (2) contractual Rate Parity lock-in — hotels are contractually prohibited from publicly advertising lower prices; (3) the unserved high-frequency segment — affluent families, SMB owners, and frequent vacationers spending \$10,000 to \$50,000 annually have no access to the bulk procurement discounts enjoyed by Fortune 500 enterprises.

3. The Solution & Value Proposition

ATLAS replaces the extractive transaction-commission model with the “Costco of Travel” membership subscription model. Wholesale inventory is acquired from institutional bedbanks at net clearing rates and passed through the closed-loop authentication gate to verified members at 0% markup.

Zero Markup Guarantee. 100% of wholesale net savings are passed directly to the member. **Guaranteed ROI.** An annual membership (\$349–\$1,499) pays for itself on the member’s first or second trip. **Integrated Travel Operating System.** Members receive 0% markup hotels, NDC flights, automated 24/7 price-drop rebooking, reloadable Visa spend cards, and an AI Travel Concierge.

4. Target Market & Customer Segments

Figure 1. Target Customer Revenue Contribution — four segments weighted by share of total member base.

- 1. Affluent Vacationers & Families (45% of base).** 2–4 luxury vacations per year. A 7-night resort stay saving \$220/night yields \$1,540 in immediate cash savings.
- 2. SMB Founders & Unmanaged Business Travelers (30% of base).** Independent consultants, agency owners, and executive teams requiring enterprise-tier rates without corporate bureaucracy.
- 3. Luxury & Villa Seekers (15% of base).** 5-star boutique suites, luxury villas, and yacht charters where 20% savings equals \$5,000+ per reservation.
- 4. Extended-Stay Professionals & Nomads (10% of base).** Multi-week bookings requiring integrated telecom (eSIMs) and visa compliance.

5. Revenue Model & Pricing Architecture

5.1 Annual SaaS Membership Tiers

Club Tier (\$349 / year). Individual & couple frequent travelers. Unlimited 0% markup wholesale booking engine, price-drop alerts, AI concierge. **Family / Patron Tier (\$699 / year).** Multi-user household access (up to 4 members), luxury villa access, complimentary 5G global eSIM bundles. **VIP / Corporate Tier (\$1,499 / year).** Multi-seat business access, corporate expense exports, reloadable metal Visa card, 24/7 dedicated WhatsApp/Telegram concierge desk.

5.2 Fintech Interchange Revenue

Co-branded reloadable Visa debit cards powered by Stripe Issuing generate **1.2% net interchange revenue** on all member travel and non-travel transactions. This secondary revenue stream compounds with member tenure and card-spend depth.

6. Unit Economics & Metrics

Metric	Value
Blended Annual Subscription ARPU	\$684.00

Annual Fintech Interchange per Member	\$166.20 (\$13,850 avg spend × 1.2%)
Total Annual Revenue per User	\$850.20
Customer Acquisition Cost (Blended CAC)	\$115.00
Gross Margin on Subscriptions	94%
CAC Payback Period	1.6 months
3-Year Customer LTV (18% annual churn)	\$4,440
LTV : CAC Ratio	38.6 : 1

7. Technology & Infrastructure (Google Cloud Ecosystem)

ATLAS is engineered natively on the Google Cloud Ecosystem. **Infrastructure & Edge Distribution:** Google Cloud Run provides serverless container execution with automatic autoscaling, while Google Cloud CDN delivers ultra-low latency edge distribution. **Database & Storage:** Google Cloud SQL for PostgreSQL (v16) serves as the primary transactional database, accessed through Cloud SQL Auth Proxy for zero-IP-exposure tunneling; Google Cloud Storage (GCS) holds encrypted reservation archives. **Artificial Intelligence:** the ATLAS AI Concierge is powered natively by Google Cloud Vertex AI and Gemini models, using Vertex AI Function Calling to query RateHawk, Hotelbeds, and Duffel APIs in real-time. **Security & Compliance:** Google Cloud Armor provides enterprise-grade DDoS mitigation and bot protection, forming the foundation of the Rate Parity Compliance Shield. All credentials are encrypted in Google Secret Manager under strict IAM least-privilege policies.

8. Use of Proceeds (\$75,000 Pre-Seed Budget)

Asset-light architecture. ATLAS leverages modern, asset-light API protocols (RateHawk B2B, Duffel NDC, and Stripe Issuing) that settle bookings synchronously via real-time card authorization at the moment of reservation. This architecture requires **\$0 in locked supplier deposits or legacy airline IATA bonds**. Unlike legacy travel agencies that lock up \$50k–\$100k in non-productive bank guarantees and hotel room blocks, ATLAS operates a pure software model with zero inventory liability.

8.1 Standardized Allocation Table

Category	Allocation	% of Raise	Key Deliverable / Monthly Breakdown
Founder Executive Stipend	\$25,000	33.3%	\$2,500/mo over 10 months for full-time founder commitment.
Contract Engineering & Tech Ops	\$18,000	24.0%	6 milestone dev sprints for live RateHawk, Duffel & Google Cloud Run CI/CD.
Member Acquisition & Distribution	\$16,500	22.0%	Targeted executive flyer outreach, “Savings Audit” marketing, and creator seeds.

Legal, SoT Licensing & Entity Setup	\$6,500	8.7%	Delaware / Wyoming LLC formalization and Seller of Travel (FL/CA) compliance.
Google Cloud & Vertex AI Tokens	\$3,500	4.7%	12 months Google Cloud Run, Cloud SQL, Cloud Armor, and Gemini 2.0 API calls.
Contingency Operating Buffer	\$3,500	4.7%	Cash reserve guaranteeing 10–12 months of operational runway.
Minimal Revolving Operating Float	\$2,000	2.7%	Working float for instant card generation (\$1,200) and eSIM inventory (\$800).
TOTAL	\$75,000	100.0%	Funded to 1,000 active members and cash-flow profitability.

Capital efficiency. Over 57% of this round (\$43,000 across the Founder Executive Stipend and Contract Engineering) is invested directly into human execution rather than idle deposits or capital-intensive infrastructure. This lean allocation model is enabled by the asset-light API architecture described above and is the structural reason ATLAS can reach 1,000 paying members and cash-flow profitability on \$75,000 of total capital.

9. Investment Mechanics & LLC Structure

Securities offered in this round are YC Post-Money SAFE for LLCs, convertible into **Preferred Membership Units** at the \$1,750,000 valuation cap. At the election of the Manager, the Company may convert into a Delaware C-Corporation immediately prior to a qualified financing round to accommodate institutional venture funds, preserving all investor rights, valuation caps, and Section 1202 QSBS eligibility.

10. Risk Factors

Prospective investors should consider, among others, the following risk factors: (a) ATLAS is a pre-revenue early-stage company dependent on completing Phase 2 supplier integrations to generate live booking revenue; (b) the closed-loop rate-parity legal interpretation may be challenged and requires ongoing compliance oversight; (c) the business depends on continued wholesale access to third-party bedbanks whose commercial terms may change; (d) SAFE securities are not guaranteed and may result in total loss of capital; (e) LLC tax treatment (Schedule K-1 pass-through) differs from C-Corp taxation; (f) projected member counts, ARPU, and EBITDA margins are forward-looking estimates subject to market and execution risk.
