INVESTOR PITCH DECK · CONFIDENTIAL

10-Slide Investor Presentation

ATLAS Travel Club LLC — Pitch Deck

Company:	ATLAS Travel Club LLC (Manager-Managed LLC — Delaware / Wyoming)
Raising:	\$75,000 USD via YC Post-Money SAFE for LLCs
Valuation Cap:	\$1,750,000 USD · 20% Discount
Format:	10 slides for a 30-minute meeting (20 min pitch + 10 min Q&A)
Date:	September 19, 2026
Classification:	Confidential — Subject to Mutual NDA

10-Slide Investor Presentation

Each slide below is presented with its visual direction and talking points. Slides should be rendered in a 16:9 presentation tool (Pitch, Google Slides, or Keynote) using the ATLAS brand palette: navy (#0B2545), accent blue (#1F6FEB), teal (#0E7C7B), amber (#B45309), and white. The deck is calibrated for a 30-minute investor meeting: 20 minutes of presentation, 10 minutes of Q&A.

SLIDE 1 Cover & Elevator Pitch

Headline: ATLAS Travel Club — the digital Costco for travel.

Sub-headline: The private membership club passing 100% of wholesale travel savings to members at 0% markup.

Visual: Crisp mockups of ATLAS web app on desktop and mobile showing 0% markup rates alongside live Expedia/Booking.com price benchmarks.

Presenter: Pål Juritzen, Founder & Managing Member.

SLIDE 2 The Problem — The \$350B OTA Tax

- **The public travel market is broken:** Booking Holdings and Expedia Group operate a duopoly, charging hotels 15%–30% commissions.
- **Rate parity lock-in:** Hotels are legally barred from displaying discounted rates on public websites, leaving frequent travelers and families paying retail markup.
- **The unserved center:** Affluent families, SMB founders, and luxury travelers waste tens of thousands annually because they lack Fortune 500 negotiated enterprise rates.

SLIDE 3 The Solution & Regulatory Arbitrage

- **Closed-loop legal exemption:** Under US Sherman Antitrust and EU Loi Macron / EC AT.40153, rate parity restrictions do NOT apply to closed-loop, password-protected membership clubs.
- **The digital Costco for travel:** ATLAS acquires inventory directly from global B2B bedbanks (Hotelbeds, RateHawk, WebBeds) at wholesale net cost and passes 100% of the savings to authenticated members.
- **0% markup:** We take zero commission on travel bookings. We monetize purely through recurring memberships.

SLIDE 4 The Four High-Value Target Segments

- **Affluent Families & Vacationers** (\$8k–\$25k/yr spend) — 45% of base: save \$1,500+ on a single 7-night luxury resort holiday.
- **SMB Owners & Consultants** (\$15k–\$60k/yr spend) — 30% of base: enterprise-grade corporate rates with zero bureaucratic overhead.
- **Luxury & Experiential Travelers** (\$30k–\$100k+/yr spend) — 15% of base: 5-star suites, villas, and private charter access at transparent pricing.
- **Borderless Remote Professionals** (\$10k–\$30k/yr spend) — 10% of base: extended stays, global 5G eSIMs, and visa intelligence.

SLIDE 5 The Product — Phase 1 Built & Functional

- **Live production app:** Next.js application deployed on Google Cloud Run with interactive retail price comparison benchmarks.
- **Proprietary rate-parity shield:** robust authentication gate (AuthMod1), crawler blockers, and Google Cloud Armor DDoS protection.
- **Autonomous AI Travel Concierge:** powered by Google Cloud Vertex AI (Gemini) with Function Calling for real-time multi-supplier inventory routing.

SLIDE 6 Business Model & Unit Economics

- **Multi-tier recurring SaaS:** Club \$349/yr; Family/Patron \$699/yr; VIP/Business \$1,499/yr.
- **Secondary revenue:** 1.2% debit interchange yield on co-branded reloadable Visa cards.
- **Attractive unit economics:** blended ARPU \$850/yr; blended CAC \$115; payback period 1.6 months; LTV \$4,440 (38.6x LTV:CAC).

SLIDE 7 Traction, Assets & Roadmap

- **Phase 1 (Completed):** fully responsive front-end, compliance shields, rate calculators, and operational manuals — deployed on Google Cloud Run.
- **Phase 2 (Months 1–3):** connect live RateHawk / Hotelbeds XML/JSON feeds, Duffel NDC flights, and Stripe Issuing.
- **Phase 3 (Months 4–6):** launch 24/7 price-drop rebooking engine and automated 5G eSIM provisioning.
- **Phase 4 (Months 7–12):** high-touch WhatsApp/Telegram AI Concierge and private jet empty-leg distribution.

SLIDE
8

Go-to-Market (GTM) Strategy

- **The “Live Savings Audit” tool:** prospective members upload an upcoming hotel confirmation; ATLAS instantly shows the exact dollar savings behind the member gate.
- **B2B syndicate partnerships:** distribution through boutique corporate travel managers, wealth management perks, and executive networks.
- **Zero-risk value guarantee:** “If ATLAS doesn’t save you more than your annual membership fee on your first booking, we refund 100% of your membership.”

SLIDE
9

Competitive Landscape & Moat

- **vs. public OTAs (Expedia/Booking):** ATLAS is 20%–30% cheaper on every hotel stay.
- **vs. legacy travel clubs (Inspirato):** Inspirato costs \$10k–\$30k/yr with high capital risk. ATLAS is accessible (\$349–\$1,499/yr) and completely asset-light — \$0 in supplier deposits.
- **The moat:** closed-loop supplier compliance, proprietary price-drop rebooking engine, 100% Google Cloud native architecture, and high-retention subscription cash flows.

The Ask & Capital Plan

Raising: \$75,000 USD via YC Post-Money SAFE for LLCs (Manager-Managed LLC — Delaware / Wyoming).

Valuation cap: \$1,750,000 USD · 20% discount · ~4.3% ownership at cap.

Asset-light architecture: \$0 in supplier deposits or legacy IATA bonds. Real-time card authorization via RateHawk B2B, Duffel NDC, and Stripe Issuing.

Capital allocation (over 57% into human execution):

- Founder Executive Stipend — \$25,000 (33.3%) · \$2,500/mo × 10 months
- Contract Engineering & Tech Ops — \$18,000 (24.0%) · 6 dev sprints
- Member Acquisition & Distribution — \$16,500 (22.0%)
- Legal, SoT & Entity Setup — \$6,500 (8.7%)
- Google Cloud & Vertex AI Tokens — \$3,500 (4.7%)
- Contingency Buffer — \$3,500 (4.7%) · Minimal Operating Float — \$2,000 (2.7%)

Milestone: complete live API integrations and reach 1,000 paid members (\$850,000 net ARR run-rate) within 9–12 months.

Presenter closing line. “We’re raising \$75,000 — not \$750,000 — because the asset-light API architecture means we carry zero inventory liability and zero supplier deposits. Over half of this round goes straight into the founder and engineering talent that will ship Phase 2 and land our first 1,000 paying members. I’d like to show you the live staging app and walk you through a real Four Seasons savings audit.”
