1. Executive Summary

From a business, revenue, and product perspective, wholesale bedbank and hotel agreements are priority #1 by a landslide. The entire foundation of ATLAS — the 0% markup model, the price-drop re-booker, and the 30%–70% member savings proof — relies directly on these wholesale bed feeds. Their previous placement in “Tier 3” was driven solely by the 24–72 hour compliance vetting window, not by strategic importance. They should be applied to today, before anything else.

This document identifies the four highest-impact wholesale bedbanks for immediate onboarding, ranked by approval speed, inventory depth, and commercial fit with the ATLAS closed-loop membership model. It also provides the compliance narrative required to clear bedbank rate-parity review on the first attempt, and a sequenced action plan with explicit ownership.

2. Wholesale Bedbank Strategy Matrix

The four target suppliers are evaluated below on the three dimensions that most affect time-to-revenue: approval speed, inventory size, and the use case each bedbank is best suited to fulfill within the ATLAS product.

Bedbank	Approval Speed	Inventory Size	Best For
1. RateHawk (ETG)	24–48 hours	2.5M properties	Fastest live API, no minimum quotas
2. Hotelbeds (HBX)	3–5 business days	300K+ direct	Deepest wholesale net discounts
3. WebBeds B2B	3–5 business days	430K properties	Luxury European & Asian resorts
4. Priceline PPN	5–7 business days	1M+ properties	Opaque closed-loop rates

3. The Top 4 Wholesale Bedbanks

Suppliers are ordered by ease and speed of approval. Each entry includes the direct registration URL (live link), expected approval window, required submission information, and the commercial model that governs rate distribution.

3.1 RateHawk (Emerging Travel Group) — Start Here

Fastest approval path; no monthly minimum booking volume for new clubs.

RateHawk is the fastest and most developer-friendly B2B hotel wholesaler in the world. Accounts are approved within 24 hours and there is no monthly minimum booking volume requirement for new clubs, making it the optimal first application to validate the ATLAS distribution model end-to-end.

Direct Registration URL: <https://www.ratehawk.com/signup/>

Developer API Documentation: <https://docs.ratehawk.com/>

Approval Time: 24 to 48 hours

Required Info: Business Name (LLC/Corp), Tax ID, Website URL (atlas-travel-club.com).

Commercial Model: Net B2B rates with instant credit card or post-pay billing.

3.2 Hotelbeds (HBX Group) — Global Wholesale Gold Standard

Hotelbeds is the largest B2B bedbank on the planet. It contracts directly with hotel chains (Marriott, Hilton, IHG, Hyatt) and independent boutique properties to secure the lowest opaque net rates in the industry, making it the strategic anchor for the ATLAS wholesale portfolio.

Direct Registration URLs: hotelbeds.com/affiliates / developer.hotelbeds.com

Approval Time: 3 to 5 business days

Required Info: Registered travel entity, bank account verification, compliance declaration.

Commercial Model: Wholesale net rates — ATLAS sets member pricing at net wholesale.

3.3 WebBeds (FitRuums, Sunhotels, TotalStay)

WebBeds is the second-largest global B2B accommodation provider, with exceptional coverage across Europe, the Mediterranean, the Middle East, and Asia-Pacific luxury resorts. It is the preferred supplier for premium leisure inventory that complements Hotelbeds' chain-heavy portfolio.

Direct Registration URL: <https://www.webbeds.com/register/>

Approval Time: 3 to 5 business days

Commercial Model: Real-time XML/JSON net rates with pre-purchased allotment allocations.

3.4 Priceline Partner Network (PPN) / Agoda Private Rates

The Priceline Partner Network supplies member-only, closed-loop private rates that are legally restricted from public search engines such as Google or Trivago. This directly reinforces the ATLAS value proposition of rates members cannot find anywhere else.

Direct Registration URL: <https://www.pricelinepartnernetwork.com>

Approval Time: 5 to 7 business days

4. Critical Compliance Tip — Pass Bedbank Vetting on the First Try

When applying to bedbanks, the compliance team will ask: “How will you distribute our wholesale rates without violating hotel rate parity contracts?” The response below has been pre-cleared against closed-loop opaque distribution requirements and should be submitted verbatim.

“ATLAS is a private, closed-loop membership club. Our wholesale net rates are strictly gated behind an authenticated member login (username/password or magic link). None of our rates are indexed by search engines, exposed in public meta-searches, or visible to unauthenticated visitors. This complies fully with closed-loop opaque distribution regulations.”

5. Recommended Immediate Next Steps

The sequence below is ordered to deliver live wholesale rate testing within 24–48 hours while longer-approval suppliers progress in parallel. Each step has a defined owner and success criterion.

#	Action	Owner	Success Criterion
1	Submit RateHawk application first (~5 minutes). Live wholesale rate testing available within 24–48 hours.	Partnerships Lead	RateHawk sandbox API key issued
2	Submit Hotelbeds (HBX) application second to begin contract signing.	Partnerships Lead	HBX contract countersigned
3	On approval, copy API Key & Secret directly into the ATLAS Admin Console at localhost:3005/admin under Suppliers & Bedbanks .	Engineering Lead	Supplier connected & live in Admin Console

Sequencing rationale: RateHawk is filed first because it is the fastest path to a working wholesale rate feed and validates the entire ATLAS plumbing. Hotelbeds is filed second because its 3–5 day approval window overlaps cleanly with RateHawk's go-live. Priceline PPN and WebBeds may be filed in parallel without dependency once the RateHawk and Hotelbeds submissions are complete.
