1. 5-Year Financial Model & Projections

This document presents the complete 5-year pro-forma income statement for ATLAS Travel Club LLC, projecting member growth, gross travel volume (GMV), revenue composition, cost structure, and EBITDA from launch (Year 1) through expansion (Year 5). All projections assume successful execution of Phase 2 supplier integrations funded by the \$75,000 pre-seed SAFE and achievement of 1,000 paid members by end of Year 1.

Figure 1. ATLAS 5-Year Trajectory — Total Net Revenue (bars) and EBITDA (line) in USD millions, showing the inflection from launch to scale.

1.1 5-Year Income Statement (USD Millions)

Line Item	Year 1	Year 2	Year 3	Year 4	Year 5
Active Ending Paid Members	1,000	6,000	25,000	60,000	120,000
Total Gross Travel Booked (GMV)	\$13.8M	\$83.1M	\$346.2M	\$831.0M	\$1,662.0M
Subscription ARR (\$684 blended)	\$0.68M	\$4.10M	\$17.10M	\$41.04M	\$82.08M
Card Interchange (1.2% on GMV)	\$0.17M	\$1.00M	\$4.16M	\$9.97M	\$19.94M
TOTAL NET REVENUE	\$0.85M	\$5.10M	\$21.26M	\$51.01M	\$102.02M
Cost of Goods Sold (Software, APIs, SIMs)	(\$0.05M)	(\$0.29M)	(\$1.15M)	(\$2.55M)	(\$5.10M)
Gross Profit	\$0.80M	\$4.81M	\$20.11M	\$48.46M	\$96.92M
<i>Gross Margin %</i>	<i>94.1%</i>	<i>94.3%</i>	<i>94.6%</i>	<i>95.0%</i>	<i>95.0%</i>

Marketing & Member Acquisition	(\$0.18M)	(\$0.92M)	(\$3.25M)	(\$6.80M)	(\$12.50M)
Engineering & Systems Ops	(\$0.19M)	(\$0.85M)	(\$2.60M)	(\$5.20M)	(\$9.50M)
Customer Success & VIP Concierge	(\$0.04M)	(\$0.21M)	(\$0.76M)	(\$1.80M)	(\$3.40M)
Legal, Compliance & SoT Filings	(\$0.04M)	(\$0.12M)	(\$0.35M)	(\$0.65M)	(\$1.10M)
TOTAL OPERATING EXPENSES	(\$0.45M)	(\$2.10M)	(\$6.96M)	(\$14.45M)	(\$26.50M)
NET PROFIT (EBITDA)	+\$0.35M	+\$2.76M	+\$13.15M	+\$34.01M	+\$70.42M
<i>EBITDA Margin %</i>	<i>41.2%</i>	<i>54.1%</i>	<i>61.9%</i>	<i>66.7%</i>	<i>69.0%</i>

2. Use of Proceeds — \$75,000 Pre-Seed Budget

Asset-light architecture. ATLAS leverages modern, asset-light API protocols (RateHawk B2B, Duffel NDC, and Stripe Issuing) that settle bookings synchronously via real-time card authorization at the moment of reservation. This architecture requires **\$0 in locked supplier deposits or legacy airline IATA bonds**. Unlike legacy travel agencies that lock up \$50k–\$100k in non-productive bank guarantees and hotel room blocks, ATLAS operates a pure software model with zero inventory liability.

Figure 2. \$75,000 Pre-Seed Capital Allocation — 7 categories, with over 57% deployed into human execution (founder stipend + contract engineering).

2.1 Standardized Allocation Table

Category	Allocation	% of Raise	Key Deliverable / Monthly Breakdown
Founder Executive Stipend	\$25,000	33.3%	\$2,500/mo over 10 months for full-time founder commitment.
Contract Engineering & Tech Ops	\$18,000	24.0%	6 milestone dev sprints for live RateHawk, Duffel & Google Cloud Run CI/CD.
Member Acquisition & Distribution	\$16,500	22.0%	Targeted executive flyer outreach, “Savings Audit” marketing, and creator seeds.
Legal, SoT Licensing & Entity Setup	\$6,500	8.7%	Delaware / Wyoming LLC formalization and Seller of Travel (FL/CA) compliance.
Google Cloud & Vertex AI Tokens	\$3,500	4.7%	12 months Google Cloud Run, Cloud SQL, Cloud Armor, and Gemini 2.0 API calls.
Contingency Operating Buffer	\$3,500	4.7%	Cash reserve guaranteeing 10–12 months of operational runway.

Minimal Revolving Operating Float	\$2,000	2.7%	Working float for instant card generation (\$1,200) and eSIM inventory (\$800).
TOTAL	\$75,000	100.0%	Funded to 1,000 active members and cash-flow profitability.

Why \$75,000 is sufficient. The capital efficiency of this round is a direct consequence of three structural design choices: (1) the asset-light API architecture requires \$0 in supplier deposits — RateHawk, Duffel, and Stripe Issuing all settle synchronously via real-time card authorization; (2) the 100% Google Cloud Ecosystem deployment model (Cloud Run + Vertex AI + Cloud SQL) eliminates capital-intensive infrastructure in favor of consumption-based pricing; (3) the founder stipend and contract engineering allocation direct the majority of capital into human execution that ships Phase 2 and lands the first 1,000 paying members. A legacy travel-agency model would require \$150,000–\$250,000 to reach the same milestone.

3. Modeling Assumptions

Member growth. Year 1 ending 1,000 paid members is the explicit milestone tied to the \$75,000 SAFE use of proceeds. Years 2–5 assume 6x, 4.2x, 2.4x, and 2.0x annual growth respectively. **Blended ARPU.** \$684 blended subscription ARPU is held constant; the model does not assume pricing power, which represents upside. **Card interchange.** 1.2% net interchange yield is applied to total GMV at the \$13,850 per-member GMV baseline. **Cost structure.** Gross margin expands from 94.1% to 95.0% as fixed software and API costs amortize over a larger member base. EBITDA margin expands from 41.2% (Year 1) to 69.0% (Year 5), reflecting operating leverage on a fixed-cost software platform.

4. Cap Table & Dilution Notes

The \$75,000 SAFE at a \$1.75M post-money cap implies approximately 4.3% membership interest for SAFE investors at the cap. Subsequent financing rounds will dilute this position; a typical path assumes a \$1.5M–\$3M seed round at a \$6M–\$10M post-money valuation within 12–18 months, followed by a \$5M–\$10M Series A at a \$25M–\$50M valuation in Months 24–36. At the election of the Manager, the LLC may convert to a Delaware C-Corporation immediately prior to a qualified financing round, preserving all investor rights, valuation caps, and Section 1202 QSBS eligibility.

5. Forward-Looking Statements Disclaimer

This financial model contains forward-looking statements based on current management assumptions. Actual results may differ materially. Projections do not constitute a guarantee of future performance and should not be relied upon as the sole basis for an investment decision. Prospective investors should conduct independent diligence and consult their own financial, tax, and legal advisors.
